

Give your Intellectual Property practice the edge with **ktMINE**[®], brought to you by Wolters Kluwer

*“**ktMINE** offers significant time savings and unparalleled IP analytics by finding and connecting many types of IP data, such as license agreements, royalty rates, patents, and syndicated news.”*

David McIntosh,
Partner at
Ropes & Gray,
IP Transactions

Intellectual property information is complex and accessible through numerous data sources. It is difficult and time consuming to find the information you need and challenging to aggregate it so that it is usable. Wolters Kluwer is excited to bring you **ktMINE**, the only platform that finds, connects and analyzes intellectual property data, simplifying the research process, minimizing research time, and maximizing analysis power.

ktMINE is the most comprehensive repository of IP data available including license agreements, royalty rates, patents, patent assignments, U.S. trademarks, trademark assignments, M&A deals, and patent litigation gathered through a proprietary process from thousands of publicly available sources and updated daily. **ktMINE**'s intuitive search functionality, insightful reports and powerful analytics enable you to make better decisions and better advise your clients.

Faster, more accurate search results

ktMINE's search capabilities allow you to access multiple datasets and search by company, sector, technology or industry. Search filters enable you to easily refine your search results, and custom alerts can be set to notify you about any changes so that you stay current.

Insightful reports

With **ktMINE**'s reporting capability, you can instantly view a company's full IP portfolio including license agreements, patents/assignments, trademarks/assignments and M&A deals for the full corporate tree with its subsidiaries. Quickly be alerted when a company makes a change to their IP portfolio.

Powerful analytics

Through connected datasets, **ktMINE** provides analytics and insights, such as trends and transaction structures that aid in IP strategy development, valuation and decision making.

ktMINE has many practical uses:

- For mastering licensing and IP transactions use **licensing and royalty rate data** along with **company profiles**
- For effective litigation strategy use **patent, licensing and royalty rate data**
- For prosecution work use **patent analytics and company profiles** to quickly understand technology and patenting trends
- For successful M&A deals use **company profiles**
