

The most complete
research tool
for regulatory
documents and
compliance guides

MediRegs Device Regulation Suite

MediRegs Device Regulation Suite provides all-in-one access to the massive volumes of regulations related to medical device manufacturing, sale and use in the United States. Consolidated web-based tools speed research on FDA medical device regulations, with easy searches through thousands of other federal publications, guidance documents, reports and other regulatory resources.

Quick searches for critical information make it easy to get all the information required for compliance-readiness using a single, robust search tool. Fast access to up-to-date content and our extensive archives save time and connect you to key regulatory and compliance information. Bookmark, make personalized notes, and share any document via email or save to multiple formats.

What's New Email Alerts keep you informed and up-to-date on developments in the industry:

- *Daily What's New*—Highlights new content that was added each day
- *Personalized Alerts*—Delivers new documents matching your stored searches

One-stop access to complete FDA medical device regulations and more

MediRegs Device Regulation Suite enables rapid searches through the most complete collection of regulatory resources possible, including many not generally available on the Internet or government sites. Resources span many agencies and document types.

- Code of Federal Regulations, including 21 CFR and many other titles, updated continuously
- Federal Register, updated daily, with archives back to 1990
- U.S. Code and public laws
- FDA device safety information
- Freedom of Information (FOI) Logs
- Press releases, speeches, testimonies and forms
- FDA manuals and guidance documents, including CDRH guidance back to 1991
- Warning and cyber letters
- Enforcement reports and court cases
- Many other important documents and resources
