The screenshot shows the Cheetah search results page for the query "Regenerative Thermal Oxidizer". The interface includes a navigation bar with "ENERGY & ENVIRONMENT" selected, a search bar with the query, and a "FILTER RESULTS" sidebar on the left. The sidebar has three main sections: "DOCUMENT TYPE" (with sub-categories like Explanations and Annotations, News and Blogs, Laws, Rules and Regulations, Agency Materials, and Decisions), "COURT" (Federal and State), and "JURISDICTION" (Federal and State). The main results area shows 3,238 results, sorted by relevance. The first five results are listed, each with a color-coded label: "RULINGS" (red), "EXPLANATIONS" (orange), "CASES" (blue), "ACTS AND STATUTES" (purple), and "EXPLANATIONS" (orange). Each result includes a title, date, and a brief description. A "RECORD KEEPING" toolbar is visible above the results, and a "SAVED ITEMS" dropdown is in the top right.

Docket No. ER17-349-001

Order Accepting Compliance Filing Subject to Condition

(Issued November 1, 2018)

Before Commissioners: Neil Chatterjee, Chairman; Cheryl A. LaFleur and Richard Glick.

1. On March 2, 2017, PJM Interconnection, L.L.C. (PJM) submitted a filing to comply with a Commission order **¶1** that accepted, subject to condition, the Designated Entity Agreement (DEA) entered into between PJM and Transource Energy LLC for itself and on behalf of Transource Maryland, LLC and Transource Pennsylvania, LLC (collectively, Transource) (March 2 Compliance Filing). In this order, we conditionally accept the March 2 Compliance Filing, effective November 2, 2016, as requested, subject to further compliance.

**I. Background**

2. First, Transource states that the Commission approved a 50 basis point ROE adder for Regional Transmission Organization (RTO) participation. According to Transource, this treatment does not require a change to the DEA because paragraphs (a) and (b) of the cost containment language in the DEA limit the recovery of such incentives to costs incurred up to the project cost. Transource states that to the extent it exceeds the inflation-adjusted project costs, as defined by the DEA, it will reduce the ATRR associated with the project to reflect the removal of the 50 basis point

3. Second, Transource contends that because the Commission denied its request for a 50 basis point ROE adder for the risks and challenges of the project, the language in subparagraphs (a) and (b) of the cost containment language should be read as to only refer to the adder for RTO participation. Transource explains that even if the Commission had approved this request, it would not have required a change to the cost containment measures identified in the DEA.
