NEW!

**RBsource and RBsourceFilings plus RegReview™**

A new workflow solution designed for Securities Practitioners

Spend more time advising clients and less time researching and drafting SEC filings.

The federal securities laws are complex and constantly changing. Streamline the Rule-Checking process with curated links to all SEC rules, regulations and guidance associated with major SEC forms and Point-in-Time redline comparisons of all recent changes to primary law.

- **Improve Accuracy:** Attorney editors have identified and linked all content in RBsource/RBsourceFilings that should be reviewed when preparing a 10-K, 10-Q, 8-K, S-1, or Proxy, removing the potential for errors and eliminating the need for using multiple resources.

- **Optimize Search Time:** Quickly identify which primary laws have changed since your last SEC filing

- **Boost Efficiency:** Instantly review redlines showing the exact differences in laws, regulations, and forms from one period to the next

- **Streamline your Workflow:** Track your progress with interactive checkboxes and collaborate with your colleagues using the checklist download feature
Optimize Your Securities Law Workflow with a Complete Solution

- Provides an integrated checklist with links to all associated rules, regulations, forms and guidance necessary for a complete regulatory review.

- Has Changed flags alert you to updates.

- Checklist links take you instantly to associated content.

- Checkboxes and downloads track your progress and streamline your workflow.

- Point-in-Time comparisons quickly guide you to the exact language that has changed to boost your efficiency.
