## TRADEMARK LAW

### **Allen's Trademark Digest**

Allen's Trademark Digest organizes, classifies, and analyzes both published and unpublished decisions from the Trademark Trial and Appeal Board (TTAB) and Trademark Commissioner.

### **Guide to Registering Trademarks,**

**Steven H. Bazerman,**  
**Jason M. Drangel**

Provides the nuts and bolts of working within the United States Patent and Trademark Office (USPTO) registration framework for trademarks including selection of appropriate forms to use and how to communicate with the USPTO. Also provides information on the international framework for registering trademarks and trademark licensing.

### **Guide to TTAB Practice,**

**Jeffery A. Handelman**

Takes you step-by-step through practice before the Trademark Trial and Appeals Board. The author provides practical guidance on appearing before this specialized court based upon his expertise and "on the ground" experience.

### **Trademark Law Guide,**

**Thomas P. Arden**

One-stop shop for trademark research, with expert authored explanations, full text of federal and state laws, Trademark Rules of Practice, Trademark Manual of Examining Procedure, TTAB Manual of Procedure, TTAB decisions, and court decisions.

### **Trademark Law: Protection, Enforcement, and Licensing,** **Adam Brookman**

Hands-on treatise that uses a conversational style to outline the decision on what to trademark, how to go about registering it, how to defend it, and the business issues involved.

## PATENT LAW

### **Mueller on Patent Law: Patentability & Validity,**

**Janice M. Mueller**

A concise, accessible, and practical treatment of U.S. patent law with regards to all aspects of prosecution, patentability, and validity.

### **America Invents Act: Law and Analysis, 2013 Ed.,** **Foley and Lardner, LLP**

A definitive explanation of the new patent reform legislation. Brings clarity to the complex and confusing provisions of the America Invents Act.

### **Business Method Patents, 2nd Ed.,** **Gregory A. Stobbs**

Discusses the mechanics of preparing the patent application (including necessary drawings), drafting claims, and enforcing and licensing business method patents.

### **Generic & Innovator Drugs, A Guide to FDA Approval Requirements, 8th Ed.,** **Donald O. Beers,** **Kurt R. Karst**

In-depth coverage of the FDA approval process with insight into the regulatory environment surrounding drugs.

### **Law of Chemical and Pharmaceutical Invention: Patent and Nonpatent Protection, 4th Ed.,** **Jerome Rosenstock**

Practical guidance on protecting chemical and pharmaceutical inventions with discussion of topics such as: eligibility, genetic engineering, infringement defenses, and patent termination.

### **Patent Claim Construction,** **Robert C. Kahrl**

Illustrates pertinent topics in claim construction such as how to craft the language for a patent claim on the patent application, what to include, and how to defend the claim.

### **Patent Disputes: Litigation, Forms & Analysis, 2nd Ed.,** **Gregory J. Battersby,** **Charles W. Grimes**

Sample forms and checklists for patent disputes, including sample motions, sample discovery documents, sample appeals, and practice tips on the forms in the treatise.

### **Patent Interference Practice Handbook,** **Jerome Rosenstock**

Provides practical step-by-step guidance through every stage of the patent interference process; analyzes decisions of the U.S. Patent Office with attention to the priority determination criteria that apply in all North American Free Trade Agreement (NAFTA) and World Trade Organization (WTO) member countries.

# IP Virtual Library

## **Software Patents, 3rd Ed., Gregory A. Stobbs**

Breaks down the process for drafting software patent specifications and claims allowing for applications that will be approved and that will stand in court if challenged. Discusses the steps that can be taken to protect software inventions in the worldwide marketplace.

## **FREE GOVERNMENT RESOURCES**

### **The Patent Act**

The full text of 35 U.S.C. sections 1 – 376.

### **Manual of Patent Examining Procedure**

The Manual of Patent Examining Procedure describes the laws and regulations that must be followed in the examination of U.S. patent applications.

### **21 C.F.R.**

Title 21 of the C.F.R. contains the rules of the Food and Drug Administration.

### **37 C.F.R.**

Title 37 of the C.F.R. is reserved for rules related to patents, trademarks, and copyrights.

### **Trademark Trial and Appeal Board Manual of Procedure**

The TBMP provides information for litigating cases before the Trademark Trial and Appeal Board (TTAB). The manual describes current practice and procedure under the applicable authority, including the Trademark

Act, the Trademark Rules of Practice, the Federal Rules (where applicable), and precedential case law.

## **GENERAL IP LAW AND LITIGATION**

### **Commercial Law of Intellectual Property, Peter A. Alces, David Frisch, Jay Kesan, Harold F. See**

Detailed analysis of applicable U.C.C. sections, legislation, and cases as applied to IP interests.

### **Epstein on Intellectual Property, 5th Ed., Michael A. Epstein**

High-level treatise information on trade secrets, trademarks, copyrights, patents, licensing, and international issues. Sample forms provided.

### **Handbook on Intellectual Property Claims and Remedies, Patrick J. Flinn**

Examines the question of whether or not to bring an IP lawsuit from all angles. Guidance on how to file and respond to claims.

### **Intellectual Property Legal Opinions, Jon Grossman, 2nd Ed., Gabrielle Roth, Mark Thronson**

The authors take the practitioner through legal opinions and provide guidance on how to draft trademark and copyright opinions. Tactics on how to respond to audit inquiries are discussed. Patentability is also explored, a topic which has come into more prominence since the *Bilski* opinion.

### **Intellectual Property Litigation: Pretrial Practice, 3rd Ed., Eric Dobrusin, Katherine White**

The authors take on the various questions a practitioner needs to consider when filing, what type of relief to pursue, and motion practice. Case management issues are explored as are discovery mechanics.

### **IP Litigator**

Regular briefings on the latest thinking and strategies for successful IP litigation and enforcement. Supplies valuable guidance and practice tips from top litigators and industry experts in patent, copyright, ITC and customs, trademark, and international litigation.

### **Trademark and Copyright Disputes: Litigation Forms & Analysis, Gregory J. Battersby, Charles W. Grimes**

Sample forms and checklists for every step in the sequence of the litigation process from complaint to appeals in federal court and before other administrative bodies.

## **TECHNOLOGY LAW**

### **Computer and Internet Lawyer**

Provides action-oriented guidance by nationally known computer lawyers to resolve the problems that face manufacturers, developers, distributors, and users of computer, telecommunication, and online products and services. Each issue alerts the reader to legal and industry trends.

# IP Virtual Library

## **Digital Communications Law,** **Henry H. Perritt, Jr.**

Digital Communications Law (Revised Edition of former *Law and the Information Superhighway*) helps attorneys handle all Internet-related legal issues.

## **Drafting Internet Agreements, 2nd Ed., Gregory J. Battersby, Charles W. Grimes**

Explains how Internet agreements are structured as well as how to negotiate the best deals for the business.

Provides 40 sample agreements for every area of Internet practice.

## **Guide to Computer Law**

Research resource for IP, privacy, security, software licensing, computer crime, Internet, and e-commerce issues. Includes explanations, laws, regulations, and court decisions.

## **Intellectual Property and Technology Law Journal,** **Michael Epstein, Editor in Chief**

Provides monthly practical analysis of the legal issues and trends in patent, trade secret, trademark, and copyright law.

## **International Encyclopaedia of Laws: Cyber Law, Jos Dumortier**

A series of national monographs, treating the different legal subjects related to information and communication technology on the basis of a common standard outline. Contains seven main parts in addition to the general introduction: regulation of the ICT Market, protection of IP in the ICT sector, ICT

contracts, electronic transactions, non-contractual liability, privacy protection, computer-related crime.

## **Journal of Internet Law**

Provides monthly practical analysis of the legal issues and business developments brought about by online systems and computer networks.

## **Law of Electronic Commerce, 4th Ed., Jane Kaufman Winn, Benjamin Wright**

Analysis of cases and statutes addressing electronic commerce, including electronic contracting, electronic payments, IP, privacy, regulation of e-business, and e-business administration.

## **Law of the Internet, 3rd Ed., George B. Delta, Jeffrey H. Matsuura**

Analysis of various aspects of law that intersect with the Internet including applying privacy laws to electronic communications, protecting IP online, online financial services and securities transactions, antitrust, and other liability and taxation issues pertaining to electronic commerce.

## **Scott on Information Technology Law, 3rd Ed., Michael D. Scott**

Discussion of how to structure transactions involving computer products and services such as software development, marketing, and licensing. Covers the many substantive areas that affect technology law practice, including torts, constitutional issues, and IP protections.

## **Scott on Multimedia Law, 3rd Ed., Michael D. Scott**

Analysis of the substantive law with practical advice, including discussions of key topics and various trends and practices in multimedia law.

## **Federal Telecommunications Law, 2nd Ed., Michael K. Kellogg, John Thorne**

Analysis to ensure understanding and compliance with the complex regulatory landscape of telecommunications (areas include long distance services, wireless services, and the Internet and data services). Also includes discussion of relevant case law.

## **COPYRIGHT LAW**

### **Copyright Law Reporter**

Comprehensive guide for copyright research, providing full text of federal laws, Copyright Office forms, and reference materials, and court decisions.

### **Goldstein on Copyright, 3rd Ed., Paul Goldstein**

Analyzes everything about copyright law, from fair-use to international copyright issues. Keeps current with developing case law in hot-topic areas. Written by a highly respected author in the copyright world.

### **Perle and Williams on Publishing Law, 4th Ed., E. Gabriel Perle, John Taylor Williams, Mark A. Fischer**

Multi-volume treatise related to publishing agreements, privacy concerns, copyright issues, and

# IP Virtual Library

multimedia, including special emphasis on eBooks. Deals extensively with the new media types in publishing and how they've affected privacy concerns. The contracting section takes the practitioner clause-by-clause through a typical contract.

## LICENSING

### **Drafting License Agreements, 4th Ed., Michael A. Epstein, Frank L. Politano**

Written by contributors from top firms around the country, this practical treatise delves into the ins-and-outs of drafting complex agreements and covers a wide array of different areas of the law and how licensing agreements fit into them.

### **Drafting Technology Patent License Agreements, 2nd Ed., Michael J. Lennon**

Step-by-step guide for the implementation of patent licensing programs for computers, electronics, and telecommunications that also clarifies the issues involved in the enforcement and litigation of these patents.

### **IP and Antitrust: An Analysis of Antitrust Principles Applied to Intellectual Property Law, 2nd Ed., Herbert Hovenkamp, Mark D. Janis, Mark A. Lemley, Christopher R. Leslie**

Helps those drafting licensing agreements to maximize the commercial value of IP rights and to minimize antitrust risks. Co-authored by Herb Hovenkamp, author of *Antitrust Law*.

### **License Agreements: Forms and Checklists, Gregory J. Battersby, Charles W. Grimes**

Sample forms and checklists for licensing practice, including motions, discovery documents, appeals documents, and practice tips on the forms in the treatise. Checklists ensure that the practitioner has all bases covered.

### **Licensing Journal**

In-depth, practice-oriented licensing guidance by top attorneys in IP, computer technology, and entertainment law. Contains valuable strategies, cautionary tips, and creative approaches to structure the most lucrative and secure licensing deals.

### **Licensing Royalty Rates, 2013 Ed., Gregory J. Battersby, Charles W. Grimes**

Details the royalty rates for over 1,500 products and services in ten lucrative licensed product categories—art, celebrity, character and entertainment, collegiate, corporate, designer, event, sports, nonprofit, and music.

### **Milgrim's Guide to IP Licensing Roger M. Milgrim**

Roger Milgrim shares his in-depth, detailed analysis of what works—and why—when drafting IP licensing agreements. Designed to enhance the transactional skill of IP lawyers and supplement the IP knowledge of transactional lawyers.
